**Institution(s):** University of Glasgow

**Funder(s):** School of Physics and Astronomy, University of Glasgow

Glasgow Women in Physics (GWiP) aims to promote a welcoming and inclusive environment for all in our regular events covering diverse subjects. Our open-to-all events attract a varied audience ranging from our undergrad students to our head of school. GWiP is run by a team of staff, PhDs and students working within the department and we organise informal events fortnightly, which include coffee breaks, talks, and panel discussions.

**\*\*Everyone is welcome\*\***

## Project Description

- We are proud of achieving an excellent gender balance, often 50%/50% at an attendance of consistently around 20
- Our speakers are equally varied and cover diverse topics such as career advice from inside and outside of academia, covering science, work & life, careers, outreach, research culture, policy, science, mentors and role models, industry, academia, public engagement and much more.
- Our format is the following: we meet every other week for 1h in the library at 12pm, where lunch, tea and coffee is provided. We chat, eat and catch up with each other before our guest speaker takes the floor for a 30 min informal presentation or chat. Afterwards we open the table for discussion and banter.

**\*\*ALL WELCOME\*\***

## Impact & Future

- The talks have enhanced the experience of everyone working and studying in our school through informal interaction with peers, mentors, and role models.
- **We wish to reach out to similar groups across SUPA and network, change ideas and organise collaborative (online/parallel) events!**
- **If you are planning a visit to Glasgow and would like to give a lunch-time talk, please reach out!**
